

I Can't Believe It

F

Keep waiting for you to get the message

C F

Keep waiting for you to see the light

Every single morning I wake up inside your wreckage

C F

But you won't switch, you'd rather fight

F C Bb F

I can't believe it

C

F

Do you ever think about the things that you do?

F C Bb F

I can't retrieve it

C

F

Just 'cause you believe it don't mean that it's true

Told you a million times I haven't got the answers

But you inquisition me again and again

Do you think I'm a toy or just some tiny dancer

Who'll perform only for you when you say when

I can't retrieve it

Whatever it was is gone and it ain't comin' back

I can't believe it

The sky was rarely more than grey, but now it's turned all black

It's amazing that it's gone this far, you know I tried to stop it

But you keep on coming like some virus in the night

But there ain't no wonder drug or a program patch to block it

The daily storm is coming and I'd best get out of sight.

I can't believe it

Do you want a list of promises that you didn't keep?

I can't retrieve it

All those missing dreams from hours without sleep
